Make Frost

Make Frost
 Materials needed: Tin can with lid removed (a clear glass jar will work also), rock salt, crushed ice
 Have children put 2 cups of crushed ice in the can or jar.
 THE ADULT adds 1/2 cup of rock salt and mixes.
 Let sit for about 30 minutes (cover so that the children can not touch the rock salt).
 In about 1/2 hour, you should see condensation on the outside. If you leave it even longer, you will begin to see frost!

Re-tell Polar Bear, Polar Bear

North Pole - South Pole

North Pole - South Pole
Key - Locating the Poles on a Globe
Use a classroom globe or map to help young children understand the locations of the North Pole and the South Pole.

To use:

1. Talk with the students about the North Pole and the South Pole.
2. Explain the climate and geography (cold, icy).
3. Sort the animal pictures by their location.
4. Explain that there are no penguins in the North Pole!
5. Using a real map or globe is the best option. If those are not available, you can use the map and globe pictures included here.

Good Morning,
It is a wonderful day.
Today is ___ursday the .

It is _____ today.

☀️ sunny ☁️ rainy ☀️ cloudy ☁️ rainy ☁️ snowing
